DETAILED ACTION

Drawings

1. The drawings were received on 23 February 2004. These drawings are acceptable.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Metcalf (US Patent 6,239,348).
4. Regarding Claim 1, Metcalf discloses a sound source located within an enclosing surface (i.e., defining an enclosing surface around a sound source) (Fig. 2; column 4, lines 8-14), the sound source creating a sound field (i.e., generating a sound field from the sound source) (column 4, lines 19-21), transducers arranged at known locations according to a predetermined spatial configuration to permit parameters of the sound field to be captured (i.e., capturing parameters of the sound field with transducers at predetermined locations on the surface) (column 4, lines 14-19), using the predetermined parameters to model the sound field (i.e., modeling the sound field based on the parameters and locations) (column 4, lines 40-45), storing the modeled sound field (column 5, lines 11-12), allowing the model to be recalled and modified or reproduced (i.e., recalling and reproducing the sound with or without modification) (column 5,

lines 12-16), and independently driving loudspeakers at predetermined locations to recreate sound using an explosion type configuration (column 8, lines 15-26).
